Important Changes – A New Step Forward

Dear Customers and Business Partners,

We are delighted to inform you about a pivotal development in the evolution of our company:

As of December 2024,

FOS Inon Optics GmbH,

based in Siegen has become the new shareholder of **Synova Licht- und Sensortechnik GmbH**, acquiring 100% of the company's shares. This transformation enhances our innovative capabilities and opens new opportunities to provide you with exceptional solutions in light and sensor technology.

Effective December 31, 2024, Mr. Patric Ludt has stepped down from his role in the management team. The company will now be led by Mr. Georg Kessler, who will join the existing managing director, Mr. Thomas Pfeifer. Together, they bring a strong vision for the future: maintaining continuity while driving forward progress during this exciting new chapter.

The company's headquarters has been relocated to our production site to streamline operations and strengthen our focus. Our new address is:

Herborner Strasse 61, 35614 Asslar, Germany

Due to ongoing system transitions, you may temporarily receive documents such as orders, invoices, or delivery notes that still reference our former headquarters in Konz. Rest assured, we are working diligently to complete these updates immediately.

Your familiar contact points remain unchanged and are available at the usual contact details. Likewise, our current bank details will remain valid until further notice. We will provide you with advance notice of any changes.

This milestone represents a significant step forward – an opportunity to seize new possibilities from which you, as our valued partner, will benefit. Together with FOS Inon Optics GmbH, we are committed to delivering excellence and driving innovation that sets new benchmarks in our industry.

We sincerely thank you for your trust and look forward to continuing our successful collaboration. Should you have any questions, please do not hesitate to contact us.

Best regards,

Synova Licht- und Sensortechnik GmbH
